- In this course, you will learn:
  - Install and configure View components
  - Create and manage dedicated and floating desktop pools
  - Deploy and manage linked-clone virtual desktops
  - Configure user profiles with View Persona Management
  - Configure and manage desktops that run in local mode
  - Configure secure access to desktops through a public network
  - Use ThinApp to package applications
- 

### Vereiste kennis en vaardigheden:

Required knowledge and skills:

- Experience in Microsoft Windows Active Directory administration
- Experience with VMware vSphere™

Recommended training

- VMware vSphere: Install, Configure, Manage (VSICM)
- 

### Vervolg cursussen:

- VMware View: Design Workshop (VMVD)
-

## Cursusinhoud:

### Module 1 - Course Introduction

- Introductions and course logistics
- Course objectives

### Module 2 - Introduction to VMware View

- View features and components

### Module 3 - View Connection Server

- Installation and configuration

### Module 4 - View Desktops

- View Agent
- PCoIP and RDP remote display protocols
- USB redirection and multimedia redirection

### Module 5 - View Client Options

- View Client
- View Client with Local Mode
- Thin clients
- Virtual Printing with View Clients

### Module 6 - View Administrator

- Configuring the View environment
- Managing users, sessions, and policies
- Configuring and provisioning automated pools of desktops
- Role-based delegated administration
- Managing ThinApp applications within View
- Monitoring the View environment

### Module 7 - Configuring and Managing Linked Clones

- View Composer operations
- Deploying and provisioning linked-clone desktops
- Managing linked-clone desktops •  
Managing persistent disks

### Module 8 - View Persona Management

- Configuring user profiles with View Persona Management
- Persona Management and Windows Roaming Profiles
- Configuring a Persona Management deployment
- Best practices for a Persona Management deployment

### Module 9 - Local-Mode Desktops

- Configuring local-mode desktops
- View Transfer Server and Transfer Server repository
- Local-mode operations

### Module 10 - Managing View Security

- Configuring the View security server
- Network configuration and authentication options

### Module 11 - View Connection Server Performance and Scalability

- Replica connection servers
- Performance considerations and load balancing

### Module 12 - Command-Line Tools and Backup Options

- vdmadmin utility
- Clients systems in kiosk mode
- Backing up the View databases
- Restoring the View databases

### Module 13 - VMware ThinApp

- Using ThinApp to capture applications
- Deploying and updating ThinApp packages
- Virtualizing Internet Explorer 6 for use on a Windows 7 system
